10. BRIEF SUMMARY OF SIGHTING 1. Triangular obj with rounded corners observed above a/c at 18,000 ft. Appeared to be stationery. Lost sight when a/c went into cloud bank. In sight for 5 min. Pilot stated that he had observed many balloons and that this was not a balloon. Daylight observation. Initial impression of object was that of a/c in turn, however it did not change position during the five minutes it was observed. Local Air Control stated that there were no a/c in vicinity that could account for object. Estimated one mile distant. Obj grew smaller. Appeared to be drifting with wind. Winds 35 knots WSW.		11. COMMENTS Object drifting with wind. Color also consistant with Balloon observation. Case evaluated as a balloon. TWX received 29 Jul of 16 Jul sighting. No attempt made to identify specific balloon due to delay in receipt of report.
